Two Days Training Programme on

ADVANCES IN LUBRICATION AND LUBRICANTS

(16-17 Dec 2019 at Mumbai)

It is often said that industry rides on a film of oil and that this film of oil is frequently taken for granted. It's time we start talking about "precision lubrication," giving it the same degree of urgency and importance as say, precision alignment. These Two Days course covers the recent advancement in lubricant understanding "the Rights" about lubrication and lubricant so as to run your machine a long and happy life.

Learning Objective:

The course will train you to identify the Right lubricants at Right time & Right Quantity through delivery of Frictions & its effect on machine life, lubricants & its types, performance characteristics, Additives' roles and effect, factors for selection of right kind of lubricant, test methodology & its significance, storage, handling, dispensing and failure analysis.

Training Contents cum Delivery Schedule:

Day 1	Day 2
Session: I [9.30 am to 1.30 pm] with 15 min Tea break <ul style="list-style-type: none">• Introduction• Basics of Lubrication• Why Lubricate Machines• Types of Lubricants• Lubricant as Maintenance kit	Session: [9.30 am to 1.30 pm] with 15 min Tea break <ul style="list-style-type: none">• Review of Day-I (15 min)• Grease Compatibility• Effect of over greasing• Fundamental of Industrial Oils (Four major Types) and Performance Parameters / Test Standards• Understanding basic performance characterises for different lubricating oil
